

Antibacterial folder display book

Antibacterial folder display book

- polypropylene material
- antibacterial coating with silver ions
- 10, 20 or 40 transparent pockets
- available colours: white, blue, pink, green
- format A4

The antibacterial folders are innovative products designed to be used in schools, offices and places in which people are particularly exposed to bacteria, such as hospitals.

These products with the special coating with silver ions diminish the risk of contact with germs. Silver damages bacteria's cell membrane, thus weakening the germs and making their development impossible.
